Valkyrie Analytics, Inc. (208) 918-0055 contact@valkyrieanalyticsinc.com

Valkyrie Analytics, Inc., a sister company of the anaerobic digestion industry's leading private research establishment, Digester Doc, is pleased to announce the launch of its groundbreaking real-time data analytics technology, designed to apply expert operational skills to digester systems. The platform, developed and backed by a team of industry innovators and leaders, offers advanced analytics solutions to help owners and operators of anaerobic digestion facilities make informed decisions, optimize processes, and drive growth.

With the rapid growth of the RNG industry and the importance of understanding key biological process data to get the most out of your facility, Valkyrie is the necessary analytics platform that can handle large volumes of data and provide actionable insights. Valkyrie Analytics' platform does just that, combining powerful algorithms, machine learning, and visualization tools to provide industry leaders with a comprehensive understanding of their data.

"Our platform is designed to empower businesses of all sizes to make better decisions by leveraging the power of data," said Will Charlton, CEO of Valkyrie Analytics, Inc. "We understand that businesses need to be agile and responsive to changing market and system conditions, and our platform is built with that in mind. Our goal is to help owners and operators make data-driven decisions that lead to growth and success."

The Valkyrie Analytics platform offers a range of features that make it a powerful tool for industry intelligence, including:

- Continuous delivery of real-time critical biological process data
- Data hosted in a secure cloud environment
- Turn-key installation setup & calibration
- On-demand data historian & reporting
- Automated push alerts flagging when process conditions stray from optimal values
- No upfront investment

"Our platform is designed to be user-friendly and accessible to operations of all sizes," said Charlton. "We believe that data analytics should not be a luxury reserved only for large companies."

Valkyrie Analytics is already making waves in the renewable natural gas industry, with early adopters praising the platform's ease of use, powerful features, and affordability.

"We've been blown away by the capabilities of the Valkyrie Analytics platform," said Charlie Stutesman, Vice President of Business Development at Eco Partners, LLC. "The platform has helped us identify new opportunities, optimize our operations, and leverage data to bypass costly shutdowns of our digester."

The Valkyrie Analytics platform is available now. For more information or to schedule a meeting to learn more, visit <https://valkyrieanalyticsinc.com/>.
